About: **Automation systems supplied by SAT Ltd. - Sofia,
Bulgaria**

During the period from 1999 to 2001 year in entrusted to me plant "Plevenski Cement" Ltd. – Pleven, Bulgaria, TITAN was finished Reconstruction and Modernization of the following sections:

Coal Grinding Plant;

BULK Cement Loading Facilities including electronic weighbridge for trucks;

Raw Mill Feeding, including supply of weigh feeders – 2 pcs;

Cement Mill Feeding, including supply of weigh feeders – 13 pcs;

Part "Electro" and "Automation" was designed, manufactured and delivered in exploitation "turn key bases" from SAT Ltd.- Sofia, Bulgaria.

In the systems are used the most contemporaneous decisions for control of the devices, based on the program-technical devices SIMATIC S7-400, S 7-200, STEP 7, WinCC of SIEMENS.

The systems are executed on a top- technical level, ensuring high reliability and comfort of the work with them.

In the systems are reflected every requirements about hardware and software of TITAN for the analogous deliveries.

The Company SAT Ltd. showed very good collective work at implantation of the systems, keeping extremely short terms of supply, working overtime without this to reflect of the quality of services.

The specialists of SAT Ltd. work very successfully with specialists from the plant and this improve quality of training and support of the systems.

SAT Ltd. timely and qualitatively finish the necessary additions and changes in the systems, arising at their exploitation.

The Company SAT Ltd. ensured reliability guarantee and after guarantee service of the systems.

Envisage the excellent results realized in the indicated sections, the Company SAT Ltd. is chosen from "TITAN" Ltd. like prefer supplier of automation systems for the future projects, which will be realized in the plant and we recommend to use the Company SAT Ltd. at realization of analogous projects.
